#### About New Millennium

NML is a Canadian iron ore exploration, evaluation and development company with an extensive property position called the Millennium Iron Range (“MIR”) in Canada’s principal iron ore district, the Labrador Trough, straddling the Province of Newfoundland and Labrador and the Province of Quebec, in the Menihek Region around Schefferville, Quebec. The Company’s project areas are connected via a well-established, heavy-haul rail network to the Port of Sept-Îles, Quebec.

Tata Steel Limited (“Tata Steel”), a global steel producer and industry leader, owns 26.2% of the common shares of the Company and is its largest shareholder.

NML has a 4.32% interest in Tata Steel Minerals Canada Ltd. ("TSMC"), which is owner and operator of a direct shipping ore ("DSO") project near Schefferville. The DSO project produces and ships sinter fines. Subsidiaries of Tata Steel and the Quebec Government's financing arm, Investissement Québec, own the remainder of TSMC.

Beyond TSMC, the Company offers further development potential through a group of long-life taconite properties capable of producing high quality pellets and pellet feed to service the requirements of steel makers with either blast furnace or direct reduced iron making operations.

In June 2016, the Company optimized its taconite development strategy through the design of a smaller market entry initiative called the NuTac Project.
